Forging demonstrations

**29th March 2015** 3rd day forging  
competition  
Prices giving ceremony

### An annual meeting for European farrier students

According participants and organizers the first edition in 2014 was a success, which permits us to make it better. The 2015 competition are coming and we can announce some changes.

As the organization likes to see participate first years students to give them the taste for this kind of competition, this year also new students of the BTM (certificate of trade technics) can participate.

Beside that EFFA the European Federation of Farriers Association, asked MFR de Saligny to organize its Educational Event, a meeting of farriers students, teachers and practical trainers for all europe to learn, compete and compare farrier training in europe.

That proves that our organization is well know under professionals ; And now we have to keep up our standards.
